REXTON

RELY ON REXTON

Life becomes a challenge when hearing starts to go. At Rexton, we won't let hearing loss hold people back. That's why we work hard to deliver proven hearing technology in the most reliable way.

Rexton hearing aids get the job done every single time. They will perform reliably at home, at work, during exercise, and wearers can wear them in all weather. That's because they are built tough, using the highest quality materials, and tested rigorously to make sure they can answer all the challenges that life throws at you.

Noisy rooms? Drop them accidentally? Caught in the rain? Working in a harsh environment? Don't worry about it. And they can handle much more. Simply put, they'll keep wearers prepared for every situation. They are made Lifeproof.

Portfolio Overview 23

REACH TECHNOLOGY

Every voice matters, and Rexton Reach makes sure every voice is heard. These rechargeable hearing aids with Multi-Voice focus enable wearers to keep track of multiple voices simultaneously, even when there is background sound. And when the wearer needs to reach out to someone much further away, no problem. Reach connects seamlessly with smartphones.

MULTI-VOICE FOCUS

Multi-Voice Focus scans the surrounding environment 1000 times a second with 4 independent focus beams. This enables it to constantly adapt to the changing dynamics of the conversation and make the experience fluid and comfortable. It will boost the prominence of those in the group who are speaking while keeping track of those who are silent, and all without switching between modes, and with no delays.

VOICE STABILIZER

Voice Stabilizer controls the compression to ensure all voices within the focus beam are amplified in the best linear ways when the sound gets too loud. It allows for more aggressive compression of the noise and more linear processing of speech to ensure a strong contrast between speech and noise. Benefit: voices remain untouched while surrounding noise is managed.

CONNECTIVITY - LE AUDIO READY

Reach hearing aids have MFI and ASHA protocols and connect seamlessly with compatible smartphones. In addition, they are future-proof and offer the latest Bluetooth LE Audio protocol and will require only a simple firmware update to connect to the latest technology.

LIFEPROOF

Rexton hearing aids are built using robust components and are tested extensively to ensure they can endure harsh environments and you can rely on them in everyday challenges.

SOUNDPRO 3.0

SoundPro 3.0 automatically steers all sound processing features, including the new Multi-Voice Focus* inputs, based on the analysis of the acoustic scene. When changing the strategy to Natural Focus or Speech Focus, the recommended balance of features is modified. Balanced Focus is recommended for enhanced automatic performance.

* Only for 2-Mic devices and binaural fittings

MFI + ASHA + BLUETOOTH LE AUDIO

Reach hearing aids can stream calls and audio from an iPhone® or Android™ phone.*

TELECARE

Full remote fitting sessions via Connexx resulting in higher wearer convenience and satisfaction.

HEADSET MODE

Rexton Reach can use the hearing aid microphones as a headset so iOS and BLE Audio wearers can enjoy hands-free phone calls.

MY VOICE 2.0

Automatically reduces the sound of the wearer's voice when they speak so their voice sounds more natural to them.

AUTOECHO REDUCER

Automated environment scan to reduce effects of disturbing reverberation on the perceived sound signal.

ATEX

Rexton Reach have ATEX certification which verifies that they are tested and approved to be intrinsically safe for use in potentially explosive environments.**

* Phones with Bluetooth 5.0+ and Android 10 (or higher) are capable of providing wireless streaming via ASHA, but ASHA must be enabled by each phone manufacturer and service carrier.

**They can be safely used in areas where there may be flammable substances in the air such as paint and chemical manufacturing, petrol stations and mills. The ATEX group/class is printed on the ATEX card, which must be available at hand when the hearing aids are used in explosive atmospheres. Ask your hearing care professional for your ATEX card.

REACH R-LI T

REXTON Reach is the rechargeable hearing aid that enables wearers to keep track of multiple voices simultaneously while connecting seamlessly to smart devices.

-  Rexton App
-  Rexton Assist
-  TeleCare
-  Made for iPhone + Android ASHA + BT LE AUDIO
-  Headset Mode Tap Control

- > Features Multi-Voice Focus for greater benefit when conversing in a group
- > Rechargeable Li-ion battery for full day use up to 39h (or 34h includes 5h of streaming)
- > Charging on-the-go with Connexx Travel Charger
- > Programable via NoahLink wireless
- > ATEX certified
- > Lifeproof
- > Water resistant, IP 68

BICORE TECHNOLOGY

Catching the important word of a colleague, registering the sound of the machinery, the people or the environment in any situation, is at the center of the Rexton BiCore technology.

Rexton is reliable and solid listening, even in demanding situations thanks to the breakthrough BiCore Technology – getting the job done is what is most important.

There are three special reasons why you can rely on every hearing aid in the range:

CLEAN SOUND

BiCore uses innovative sound processing to faithfully reconstruct the environmental soundscape for the hearing aid wearer.

The robust input stage and new A/D converter reliably handle sounds of all levels without distortion, ensuring that what comes in also goes out the same way, clean and smooth.

RELIABLE TECHNOLOGY

Patented Speech Preservation Technology (SPT) minimizes unwanted noise and preserves speech sound. SPT takes advantage of the spatial separation between target speech sounds and competing noise. This directional analysis allows for separate processing of the speech and noise before they are mixed together.

An ultra-quick wireless binaural link ensures left and right hearing aids are always synchronized and react instantly and precisely to changes in the sound environment.

LIFEPROOF

All BiCore hearing aids are Lifeproof with robust construction and proven design.

Rexton BiCore hearing aids are tested extensively to ensure they can withstand whatever life throws at them. They are durable enough to withstand everyday challenges and harsh environments.

All BiCore products are IP68 certified.

MADE FOR IPHONE AND ANDROID (ASHA)

BiCore hearing aids can stream calls and audio from iPhone and Android phones.*

STREAMING

You may direct stream from your TV and other audio devices using the Smart Transmitter 2.4 or the Smart Mic.

TELECARE

Full remote fitting sessions via Connexx resulting in higher wearer convenience and satisfaction.

HEADSET MODE TAP CONTROL

Rexton BiCore microphones get the job done so iOS wearers can enjoy hands free calls.**

MY VOICE 2.0

General sound and own voice processed in parallel for a greater sound impression and wearer satisfaction.

AUTOECHO REDUCER

Automated environment scan to reduce effects of disturbing reverberation on the perceived sound signal.

* Phones with Bluetooth 5.0+ and Android 10 (or higher) are capable of providing wireless streaming via ASHA, but ASHA must be enabled by each phone manufacturer and service carrier.

** It applies for iPhone 11 or higher with iOS 15.2 and higher.

BICORE B-LI M RUGGED

BICORE B-LI M RUGGED IS OUR TOUGHEST BTE AND CAN HANDLE ALL THE KNOCKS AND SPILLS THAT OCCUR IN EVERYDAY LIFE.

Our toughest BTE with BiCore technology for a smooth listening experience.

-  Rexton App
-  Rexton Assist
-  TeleCare
-  Made for iPhone + Android ASHA
-  Headset Mode Tap Control

Rugged has proven BiCore hearing technology that delivers a range of special features:

- > Ultra-fast adaption to changing environments
- > Patented speech preservation technology
- > Advanced binaural signal processing to reduce noise efficiently
- > Stream audio directly from iOS or Android (ASHA) smartphone
- > Stream directly from TV and other audio devices using the Smart Transmitter 2.4 or the Smart Mic

Unique tough building offering:

- > Water resistant construction
- > Sweat proof
- > Drop proof
- > Scratch resistant
- > IP68 certified
- > ATEX certified

TOUGH DESIGN IN A SUPER-COMPACT SIZE

To optimize toughness, a long list of enhancements have been made to the hearing aid structure. These include making the receiver airtight, sealing charging contacts, reinforcing receiver suspension, thickening the housing, and sealing all its parting lines. Rugged is also far smaller than conventional behind-the-ear hearing aids. Its dimensions are more comparable to those of a RIC.

Performance Level	80

ACCESSORIES & APPS

CHARGERS

Rexton offers chargers to suit your members' needs.

TRAVEL CHARGER RIC

PORTABLE AND LIGHT

Our travel charger provides up to 3 charges on-the-go so wearers can easily enjoy a relaxed weekend trip without needing a power outlet.

CHARGES

- Reach R-Li T
- BiCore C R-Li, Li T

SPECIAL FEATURES

- Holds 3 full charges
- Charges in 4 hours
- 30-minute fast-charge
- Automatic on/off
- USB-C, power adapter
- Integrated Li-ion cell

CHARGING+ STATION

DRY & CLEAN

Our premium charger goes beyond and offers extra care for hearing aids. While it charges it also provides an integrated heat drying cycle and a UV light cleaning cycle.

COMPATIBILITY

- Charging+ Station R: Reach R-Li T
BiCore C R-Li, Li T
- Charging+ Station: B-HP- M-Core B-Li HP

SPECIAL FEATURES

- Robust and scratch resistant design
- 30-minute fast-charge functionality
- USB-C, power adaptor
- Included power adaptor
- Integrated drying functionality
- Integrated UV cleaning functionality

THE COMPREHENSIVE REXTON APP

ONE FOR ALL

The Rexton App allows wearers to control their hearing system conveniently as it turns a smartphone into a discreet remote control for the hearing aids.

Telephone calls are forwarded directly from the smartphone and take priority over other audio signals; streamed music can be listened to in stereo, directly and without any additional device*.

Download the Rexton App now!

iOS

Android

SPECIAL FEATURES

- Hearing programs and volumes can be adjusted discreetly
- The volume can be set individually for the right and left hearing system
- Directionality control
- Remote support
- Real-time battery status
- Make real-time programming changes with Rexton Assist

DEVICE COMPATIBILITY

Wearers can check if their smartphone is compatible with Rexton hearing aids and app.

Scan the QR code to check smartphone compatibility for:

- Rexton App use
- Streaming phone calls and audio
- Hands-free calling

*Check the compatibility of hearing aid and smartphone device

REXTON ASSIST

Our cloud-based Artificial Intelligence neural network allows wearers to make real-time programming changes when they are on the go. Wearers can personalize their hearing aids' performance when and where challenges are occurring without having to wait for an in-person or virtual appointment.

After receiving solutions curated for that specific situation, wearers provide feedback to the living network so it can evolve based on wearers satisfaction level.

REXTON TELECARE

With Telecare**, Hearing Care Professionals can increase their service journey and provide remote support through:

- Instant messages
- Audio & Video calls
- Fine tuning

**Telecare interface can be different across technologies and form factors

AUDIO STREAMING DEVICES

Rexton offers audio streaming devices as interfaces to keep wearers connected for a pleasant hearing experience, no matter what. Compatible with Bluetooth devices only.

THE PRACTICAL SMART TRANSMITTER 2.4

THE BLUETOOTH® TRANSMITTER FOR TELEVISIONS AND STEREO SYSTEMS

The Smart Transmitter 2.4 allows direct transfer of stereo sound from audio sources such as television sets and stereo systems to the hearing systems. Simply place the hearing systems on the transmitter and the pairing process begins. The transmitter can be paired with multiple hearing systems at the same time for shared enjoyment with friends.

SPECIAL FEATURES

- No separate remote control needed
- Connecting/pairing is particularly easy
- Several hearing system wearers can connect simultaneously
- Analog and digital audio inputs (Cinch and TOSLINK)

THE COMPACT SMART MIC

DIRECT AUDIO STREAMING FROM PRACTICALLY ANY BLUETOOTH-ENABLED ANDROID SMARTPHONE

The Smart Mic enables hands-free telephone calls without members needing to pick up their smartphone. In challenging hearing environments it can easily be used as an additional microphone.

SPECIAL FEATURES

- Direct streaming from Android smartphones
- Listen to music in stereo quality
- Can be used as a conference microphone

EARWEAR 3.0

EarWear 3.0 provides a comprehensive solution which is highly reliable in its acoustic performance and highly durable so it improves the cosmetic appeal as well as physical fit & retention in the ear. So wearers enjoy the most comfortable, cosmetically appealing solution with consistently great sound.

COMPATIBLE HEARING AIDS

RELY ON REXTON

It's a tough world out there, and even tougher when your hearing starts to go. At Rexton, we won't let hearing loss hold you back. Good hearing is critical: From getting the job done, to getting home safely and being there for the people who count on you, we know what's at stake. That's why we work hard to deliver proven hearing technology in the most reliable way. We understand what reliability means in real life, and make practical, easy-to-use products you can count on. Our hearing aids have been getting the job done since 1955, so whatever life throws at you, you can rely on Rexton.

We believe that nothing hearing related should ever be left to chance, both for the people with hearing loss, and those who depend upon them. We understand their challenges and we meet them with proven hearing technology that is made Lifeproof so it can be counted upon to perform reliably in even the harshest environments. At work, at home, during leisure time, exercise and in all weather, you can always **RELY ON REXTON.**

**GETTING
THE JOB DONE
SINCE 1955**
